

REDA IFIS

Full Stack Software Developer | PHP · Laravel · Vue.js · TypeScript · Javascript

SUMMARY

Full Stack Software Developer with 4+ years building web applications using PHP, Laravel, Symfony, JavaScript, TypeScript, and Vue.js. Experienced across backend APIs, frontend components, databases, cloud infrastructure, and DevOps tooling. Contributed to e-commerce, ERP, and e-learning platforms. Open to Full Stack and Backend PHP Developer roles.

EXPERIENCE

COD NETWORK, Agadir, Morocco — *Software Engineer*

SEP 2023 - PRESENT

- Developed and shipped new features for a high-traffic MENA e-commerce platform using PHP (Laravel) and Vue.js.
- Resolved production bugs and performance issues, improving stability and response times.
- Designed and integrated RESTful APIs and third-party services, ensuring reliable data exchange across internal and external systems.
- Optimized database queries, application architecture, and backend services to improve scalability, maintainability, and overall system performance.

AJICOD AGENCY, Agadir, Morocco — *Full Stack Developer*

MAY 2022 - OCT 2023

- Designed and developed full-stack web applications using PHP (Laravel), TypeScript, and Vue.js from requirements to deployment.
- Built and managed cloud server infrastructure for multiple client projects, ensuring uptime and performance.
- Developed and maintained database schemas using MySQL and PostgreSQL. Implemented CI/CD pipelines and collaborated on Git-based workflows.

TECHNOPEK, Agadir, Morocco — *Frontend Developer*

FEB 2022

- Delivered frontend development for an e-commerce website front office and back office.
- Fixed issues related to product variant selection and improved the user experience.

Digital Elite, Agadir, Morocco — *PHP Symfony Developer*

OCT 2021 - DEC 2021

- Developed features for a custom ERP application using Symfony and Vue.js.
- Participated in bug identification and fixed production issues, and collaborated with the development team to deliver stable software releases.
